Flooring in the Transportation Industry – Bonding and designing Floor Panels and floor coverings

Abstract

Whether you're building a train or installing flooring on a bus, Industrial Adhesives and Tapes keep your floors secure, and your passengers moving forward. Currently available flooring solutions consist of sprayable adhesives, structural adhesives, hot melt adhesives, bonding tapes and adhesive sealants. Learn how to speed up your assembly process, enhance your product's durability, increase your productivity and lighten the load by reducing the number of bolts and rivets needed to hold floors secure.

Agenda

- ▶ Floor panel design
- ▶ Floor panel bonding
- ▶ Floor panel sealing and fire protection
- ▶ Floor panel vibro-acoustics
- ▶ Floor cover bonding

Lecturers

Tiphaine Flament

3M Industrial Adhesives and Tapes Division
Chemical Engineer Degree
Experience in the R&D and plant production
3 years in 3M Adhesives for Transportation and General Industry Applications

Henri Garcia

3M Industrial Adhesives and Tapes Division
European Adhesive Engineer certified by the European Welding Federation
Chemical Engineer from the Chemical Engineering Institute of Toulouse (France)
23 years of experience in Adhesives for Transportation and General Industry Applications

Access

- ▶ Skype or any other application is not required – you just need web browser
- ▶ **Sign up** is required – please register to receive more interesting information
- ▶ At the end of the lecture there will be time for a Q&A
- ▶ All material presented will be shared with participants
- ▶ An FEA workshop certificate can be provided upon request
- ▶ Contact info: Marcin Domanski mdomanski@mmm.com +48 883-343-380

When:

Monday, 20th of April 2020
10:00–10:45 AM
